SECURITY

UPGRADE YOUR ANALYST ENHANCE YOUR SOC

Timely, accurate, and contextualized threat intelligence for actionable alerts without the noise.

As a cornerstone of a mature SOC, threat intelligence drives daily operations to keep pace with the evolving threat landscape. But not all intelligence feeds are created equal. Many come with hidden costs through key weaknesses, including stale data, need for additional validation, a lack of contextualization and triage data—all of which ultimately contribute to analyst alert fatigue. At Cyborg Security, we have solved those problems with our Cybernetic Threat Feed:

PROPRIETARY DECAY MODELLING AND SCORING

Only receive indicators with a high security value so analysts can focus on real threats to the organization

MAN & MACHINE DATA VALIDATION

Reduce false positives—man and machine are fused to ensure the human element is retained in the analysis, while coupled with best-in-class machine vetting

TRIAGE & CONTEXTUALIZATION

Unique scores are assigned to each source, its associated indicators, and the overall threat so analysts can prioritize investigation and remediation efforts

CYBORG'S CYBERNETIC THREAT FEED IS AVAILABLE IN A WIDE VARIETY OF FORMATS, FOR A DIVERSE SET OF PLATFORMS*:

MISP
Malware Information Sharing Platform

elastic

OPEN THREAT EXCHANGE

{REST:API}

splunk>

MICRO FOCUS
ArcSight SIEM

Carbon Black.

*including, but not limited to

CYBORG'S CONTENT & CONTEXT ARE THE MISSING PIECES TO THE SOC PUZZLE

Cyborg's Cybernetic Threat Feed goes head-to-head with available threat feeds to provide SOC teams with the critical information they need, when they need it—making security truly proactive.

ABOUT CYBORG SECURITY

Cyborg Security is a pioneer in cybernetic threat hunting, delivering advanced, actionable threat hunting content via a first-of-its kind single platform. Cyborg's unique platform leverages the best and largest pool of threat hunting human assets and resources, applies techniques and proprietary patent pending technology, and delivers continuously updated content, context, scripts, and playbooks to be leveraged by internal teams. Cyborg provides the platform to proactively threat hunt, without outsourcing or the need to hire direct, scarce skill sets.
